Experience:

Jul 2023 - Oct 2023 – CML Team
Software Engineer. Contributed to the development of the company CRM system, focusing on Next.js and multiple 3rd-party libraries. Achieved significant improvements in page load optimization, build time, and overall project performance (Next.js). Fixed longstanding UI bugs and introduced performance optimizations. Worked on a fintech/blockchain project involving KYC (Know Your Customer) and Smart Contracts development using NestJS. Participated in task estimation and communicated directly with clients.
Wrote a web parsers to scrape large amounts of data from various websites. This script was built with minimal dependencies, making it lightweight and efficient for handling large datasets.

May 2023 – Jul 2023 (Full Time), Jul 2023 – Apr 2024 (Part Time) – BYFL.team
Backend Developer. Worked in a startup environment, primarily on the backend using NestJS. Managed communication with Frontend, iOS, and Android teams to ensure seamless integration across platforms. Performed code reviews and collaborated with team members on ensuring code quality.

Dec 2022 - Apr 2023 – Binary Studio Academy | Internship
Fullstack Developer. Worked on a fintech project **SmartSpend**, a financial management platform for tracking expenses, managing budgets, and making informed financial decisions. Contributed to both frontend and backend development. Gained experience in code reviews, eventually earning the ability to review the code of other developers. Communicated directly with clients to gather feedback and requirements.

Education:

2023 - 2026 – Jagiellonian University. Applied Computer Science
Bachelor's degree.

Languages:

English – Professional proficiency
Ukrainian – Native
